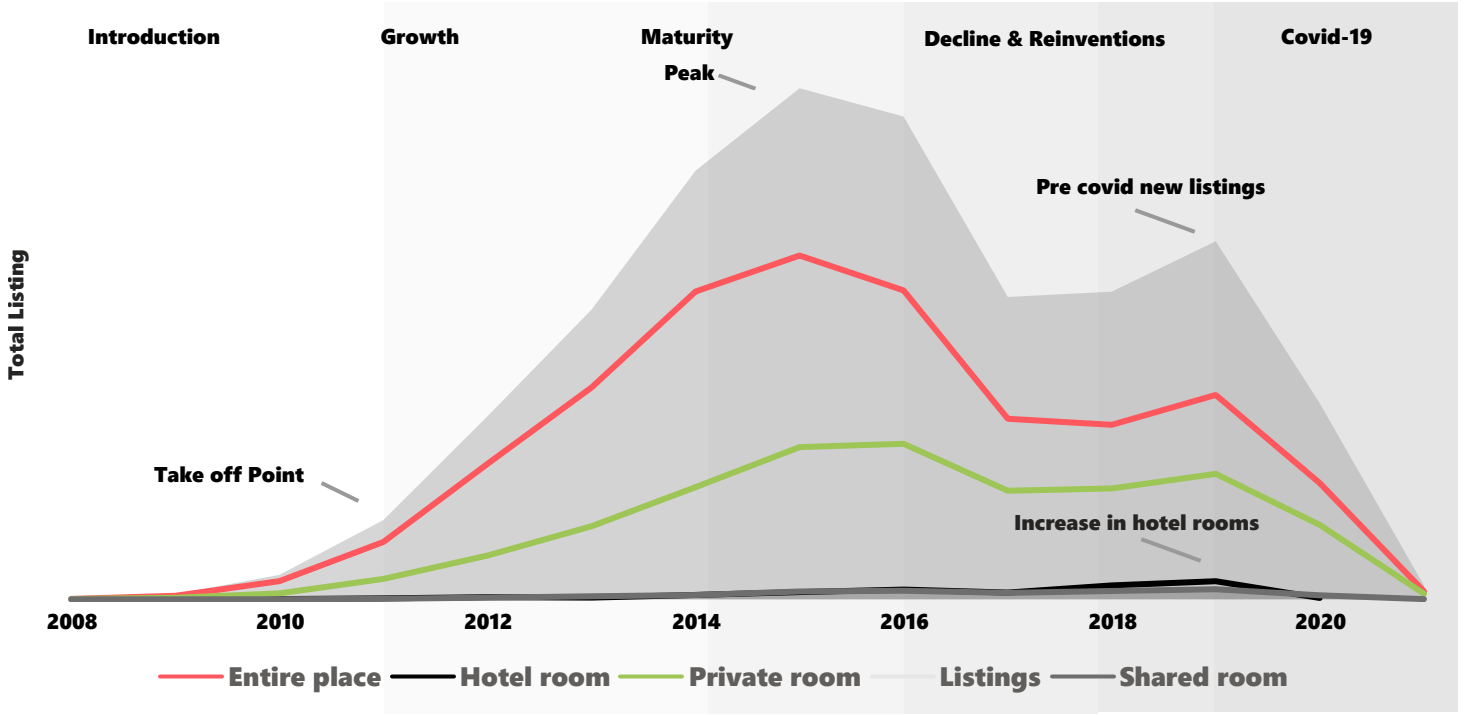
New Listings



Airbnb's growth peaked in 2015 with a surge in new listings, but regulatory tightening slowed expansion in 2016 and 2017. Despite these pressures, the company turned profitable in the second half of 2016, with 2017 becoming its first full year of generating income. Growth resumed in 2018, only to be disrupted in 2019 by the COVID-19 pandemic, which brought global travel to a halt.

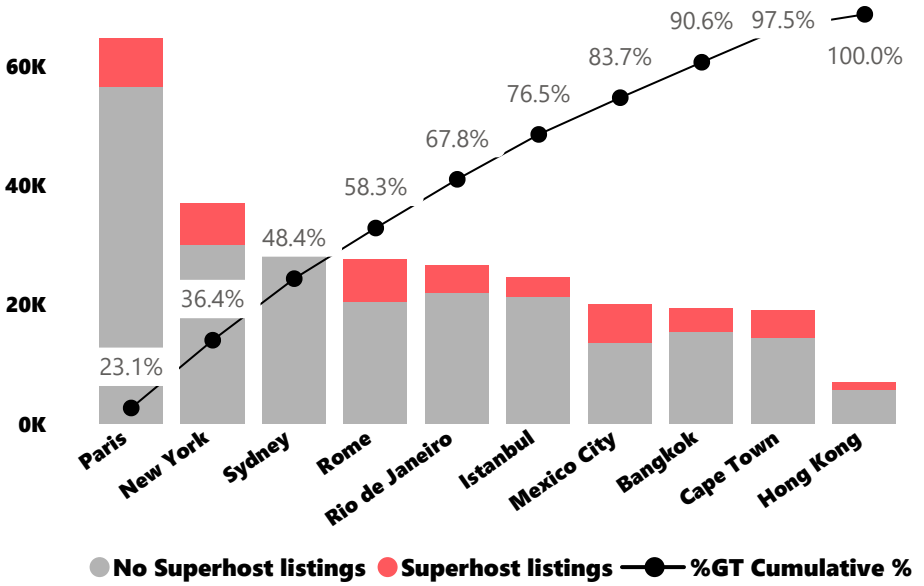
Market Share by City



Paris, New York City, and Sydney together contribute nearly 50% of total listings and 59% of all reviews.
Among them, **Paris leads in both listings and review volume.**

A potential factor behind this dominance is pricing — hotel room rates in these cities are nearly **2x higher than Airbnb options**, driving stronger demand toward short-term rentals.

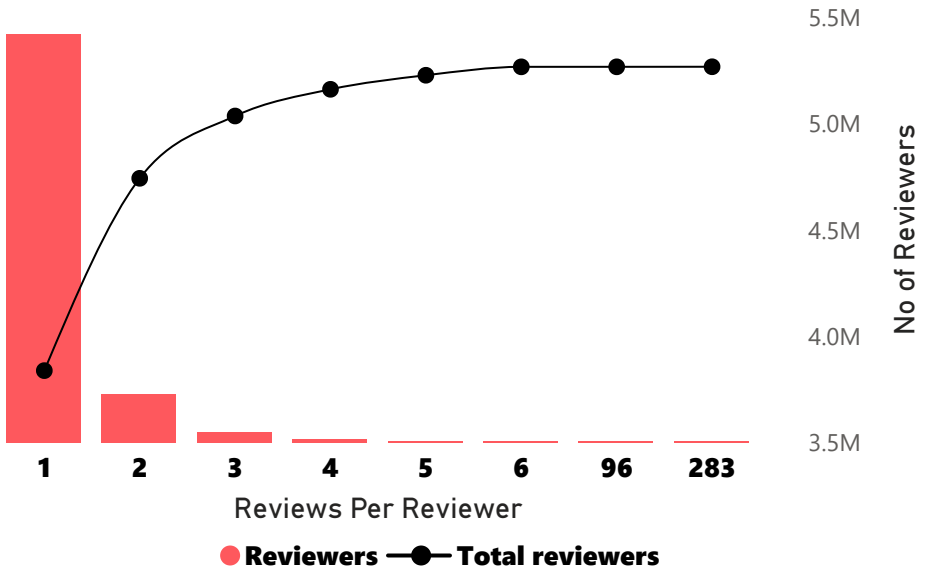
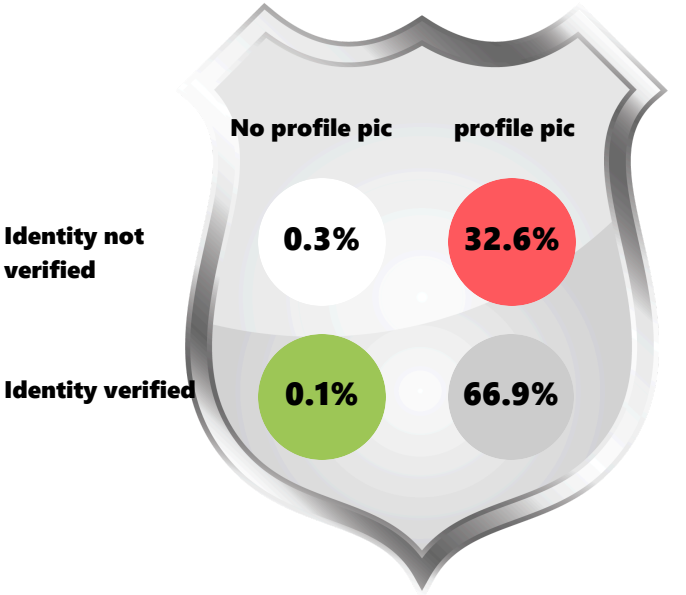
Review Frequency



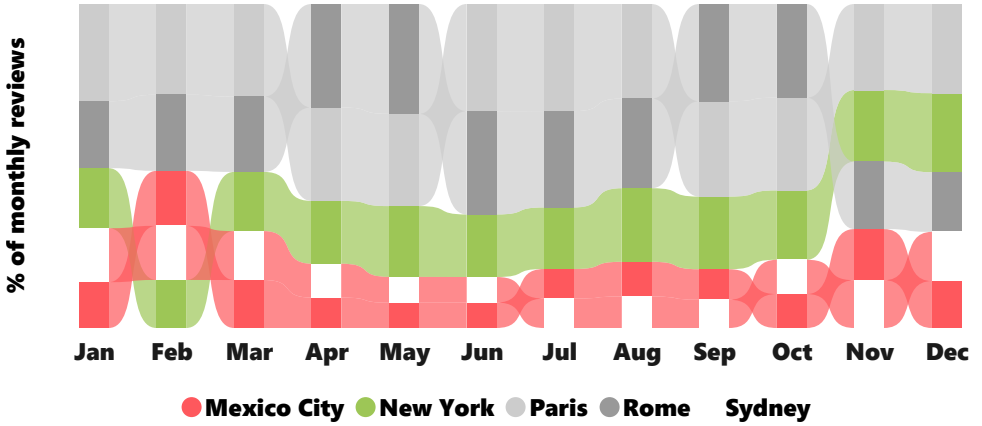
Customer review behavior shows a highly skewed distribution. **Most customers submitted only one review**, and **98.8% posted three reviews or fewer**, indicating limited repeat engagement.
One extreme outlier recorded **283 reviews**, with the last two submitted on **13-Oct-2020** for listings in Bangkok — potentially a **data anomaly or an exceptionally active traveler**.

Trust



Over two-thirds of Airbnb hosts are fully verified, reinforcing platform credibility. Additionally, **nearly all hosts provide at least one trust signal**, ensuring that unverified or anonymous profiles remain minimal.

Seasonality



Paris and Rome lead in review share from April through August, highlighting strong demand during the **peak European summer season**.
Meanwhile, **New York experiences a noticeable rise in reviews during November and December**, driven by increased travel throughout the **holiday period**.
